Oscillators

IQD oscillators are used in many telecom, military, industrial and consumer applications.

- Range of package sizes down to 1.54x0.84 mm, SMD and THT
- Frequencies from 0.000001 to 800MHz
- Supply voltages from 1.2 to 5.0V
- Frequency stabilities down to ± 5 ppm

Quartz Crystals

Quartz crystals are used in a wide range of electronic applications. IQD's quartz crystals are qualified for new designs.

- Range of package sizes down to 1.55x0.95 mm, SMD & THT
- Frequencies from 0.01 to 270MHz
- Frequency stabilities down to ± 5 ppm

OCCO

Oven Controlled Crystal Oscillators deliver the ultimate piezo electric performance with stabilities down to less than ± 1 ppb. The frequency range goes up to 130MHz.

- Range of package sizes down to 7.00x5.00 mm, SMD and THT
- Frequencies from 4 to 130MHz
- Supply voltages from 2.7 to 12.0V
- Frequency stabilities down to ± 0.2 ppb

VCXO

Voltage controlled crystal oscillator applications include telecom, test and broadcast equipment as they enable users to adjust the frequency while the circuit is active and so match an incoming signal.

- Range of package sizes down to 2.50x2.00 mm, SMD and THT
- Frequencies from 1 to 1500MHz
- Supply voltages from 1.8 to 5.0V
- Frequency stabilities down to ± 5 ppm

TCXO & VCTCXO

Temperature compensated crystal oscillators and voltage controlled temperature compensated crystal oscillators are used where the stability of a standard crystal clock oscillator is insufficient. IQD's wide range of TCXO and VCTCXO models offer tight frequency temperature stability.

- Range of package sizes down to 2.0x1.60 mm, SMD and THT
- Frequencies from 1 to 800MHz
- Supply voltages from 1.8 to 12.0V
- Frequency stabilities down to ± 0.2 ppm
